Innovative Development Models and Practices in the Globalized Economy

The University of Padova in partnership with Kazakh National University named after Al' Farabi (Almaty Kazakhstan), Wuhan University (China) and Ural Federal University named after the First President of the Russian Federation B. N. Yeltsin (Ekaterinburg, Russian Federation) presents the 3rd edition of the Summer School on Sustainable Economic Development.

This year's focus is on innovation as vector of long term sustainable development.

Setting forth a consolidated tradition of development studies, the School offers cutting-age analysis presented by world ranking experts coming from Europe, Eurasia and China, work-shops, visit of leading firms of the Veneto Region, on-the-field work on innovative companies, and public institutions.

The School's aims to transmit analytical knowledge and practical tools for understanding development dynamics, planning and implementing innovative actions at business and institutional level, finding smart solutions for complex development issues.

The School's program takes into account technological, social, territorial, political aspects alike, discusses present day challenges, and explores alternative models of sustainable economic development.

The School's methodology fosters multidisciplinary, unites macro-and micro economic studies, analytical and empirical work, participative learning, and personal research.

Didactic Organization

Courses are structured on 5 modules of 10 hours each of seminars, and work-shops, and on 1 module of at least 10 hours dedicated to on-the-field visits, and practical work.

Attendance is compulsory (at least 70% of the classes).

Attendants will receive a certificate of participation.

Modules

- 1.Global Economic Divergences and Convergences
- 2.Planning and Managing Global Value Production Chains
- 3.Finance, Banking and Assets Risk Management
- 4.Institutional Action for Innovation
- 5.Innovative Business Models
- 6.On the Field Visits and Practical Work

Prerequisites

Attendants must hold a bachelor degree and have a background on economics and/or economic history.

Mastering oral and written English is essential.

Selection's parameters are: Curriculum Vitae (50%), Motivational Letter (25%), Knowledge of English Language (25%).

University of Padova

The University of Padova, established in 1222, ranks among the most prestigious European Universities, hosting over 57,000 students, and counting on 32 Departments ranging from humanities, economics, law, political sciences to medicine, engineering, aerospace technologies.

The Summer School offers the opportunity to get acquainted to an extremely vivid educational and research world, and constitutes a unique occasion to explore on the spot new opportunities for future education.

Padua

Padua, founded in pre-Roman time, is nowadays a flourishing town of over 211.000 inhabitants with a vast Renaissance city centre, enriched by world ranking monuments, pedestrian zones, parks, vivid cultural life. Besides, it lays at the core of one of the most flourishing economic areas in Europe where tradition and innovation meet to build the future.
